

E-scooters are not toys

Know the facts

An **electric kick scooter (e-scooter)** is a battery-powered vehicle with two wheels, handlebars and a platform to stand on.

E-scooters are **not permitted** on public property in Milton.

The Town of Milton has not opted in to the Ontario e-scooter pilot program, and therefore e-scooters are not currently permitted to operate on public property within the municipality.

This means they cannot be used on:

- ✗ Streets
- ✗ Sidewalks
- ✗ Bike lanes
- ✗ Trails and pathways
- ✗ Parks
- ✗ Transit (not permitted onboard or on bike racks)

Under the Ontario pilot program, children and youth age 15 and under cannot legally use e-scooters, even in municipalities where they are permitted.

Consider the risks

Children and youth can be seriously injured while riding an e-scooter. Riding at higher speeds, not wearing a helmet and sharing space with vehicles can increase the risk of crashes and injuries.

Ask yourself:

- Is my child 16 years of age or older?
- Where will my child legally ride it?
- Do they understand the safety risks?
- Will they wear a helmet every time?
- Can they safely operate it around other people and traffic?

Know the rules. Make an informed decision.

Before purchasing or riding an e-scooter, take time to review local rules and safety information.
