Fort Chipewyan Water Treatment Plant Update

(Fort Chipewyan, AB – Aug. 19, 2026) – Tap water in Fort Chipewyan can continue to be used normally, and additional testing has confirmed that water being produced by the Fort Chipewyan Water Treatment Plant meets all aesthetic and health parameters.

Previous to this update, tap water could be used normally, but was slightly above the aesthetic parameter for manganese. Testing results have now consistently confirmed that manganese and all other parameters are within the range set out by the Guidelines for Canadian Drinking Water Quality.

As always, if you ever experience discoloured tap water, please run your cold taps for 10-15 mins. If the water doesn't clear and you have questions or need assistance, please call Fort Chipewyan Municipal Contact Office or Pulse at 780-743-7000, toll free at 1-800-973-9663 or at rmwb.ca/pulse.

See the latest updates from the Fort Chipewyan Water Treatment Plant at rmwb.ca/waterupdate.
