

Planned Maintenance at the Fort Chipewyan Water Treatment Plant

(Fort Chipewyan, AB – Sept. 22, 2026) – The Regional Municipality of Wood Buffalo will be completing planned maintenance at the **Fort Chipewyan Water Treatment Plant from Friday, September 25 to Saturday, September 26.**

The maintenance will include a scheduled valve repair within the treated water reservoir. Residents may notice increased contractor activity at the water treatment plant while the work is underway.

Additional measures will be in place to ensure **water service and water quality are maintained throughout the community** during the maintenance.

What residents may notice

The maintenance work may stir up sediment within the treated water reservoir. As a result, residents may notice **cloudy or discoloured water** after the work is completed.

If this occurs, residents should run their **cold water taps for 10–15 minutes**, or until the water runs clear. Water service is expected to continue throughout the planned maintenance.

For questions or concerns, please contact **Pulse** at **780-743-7000** or **1-800-973-9663**, or submit an inquiry online at **rmwb.ca/pulse**.
