Bill Beamish, Chief Administrative Officer
District of Sechelt
5787 Cowrie Street
Sechelt, BC
V0N 3A0

Dear Sirs:

Re: The Shores Phase 1

WEB Engineering has been informed that the District has received advise to defer or not install the recommended shallow storm sewer main replacement to the damaged existing main between lots 9 and 10. It is our opinion that the replacement and the sealing of the damaged main needs to be done as soon as possible, as pending winter storms will increase the risk of further failure.

Your truly,

Rudy Plett ASCT
WEB Engineering Ltd
